Harry Wang
Rachelle Tran
Tommy Hu

Version 1
26/04/2023

1. Scope

1.1 Document Definition

This report will serve as Cosmic Property Constructions SiteX (Central Database) Acceptance Test. The objective of the acceptance test report will be to provide guidelines for the product owner to accept the system at its current state corresponding to the function we have developed and delivered during iteration 2. Please use this document to acknowledge that the functions either satisfy or do not satisfy your business objectives and requirements while making notes if necessary.

1.2 Current Project Overview

SiteX at the the completion of the iteration will allow for a site live view where admins and builders can see who are working on a particular site.

Further hierarchy of access will also be implemented where contractors, sub-contractors and and onsite personnels are able to obtain the right access to the information they need such as documents and equipment. Furthermore admin and builders can add documents and equipment and select the appropriate access level for others to view them.

Iteration 2 Pages Overview

- The necessary pages used for iteration 2 are below

Login	Main login screen, once authenticated transfer to 'My Projects' page by default, has 'remember me' capabilities
Register	Register a new 'basic level' account
My Account	Contain account details, including personal information and ability to request account elevation to 'builder'
My Projects	Display users assigned projects as well as all projects [can view assigned project details, request project access, create projects (if you're admin), edit projects (if you're admin)]
All Projects	Display all projects and their basic information so that users can request to join them
My Company	Display details about the builders' current company
All Companies	Display all companies and their basic information that users can request to join them
Pending Requests	Display all requests that are assigned to a user

1.3 System Credentials
